# High End Bikes From Bajaj This May

Bajaj Auto is expected to roll out the first of its KTM bikes in India in May this year. According to company officials, KTM bikes, initially launched as completely knocked down (CKD) kits, will happen by the second half of the next fiscal. However, for Bajaj Auto, excitement with the niche high-end bikes will begin in mid-May, when the Kawasaki Ninja 250R is expected to hit the roads.

Its price tag is expected to be in the range of Rs 2.5-3 lac, company officials said. Bajaj Auto MD Rajiv Bajaj has been quoted as saying that the Kawasaki Ninja 250R would come in as a CBU product, priced at over Rs 2 lac.
