The wait seems to be nearing an end with news about the upcoming Pulsar 250 pouring in. According to Motoroids' sources in the component industry based around Pune, Bajaj is in the final stages of developing an all new 250cc bike for India. The engine has been under development for quite some time now and the new [Bajaj Pulsar 250](#) will feature a parallel twin, four-valve per cylinder liquid cooled 250cc engine. Power output is expected to be anywhere between 27-30bhp with top speed of 160kmph. But the most important piece of news is the pricing, which is expected to be south of Rs. 1.5 lakhs!!

With the Pulsar 250, Bajaj will take a major upward shift in technology. On the cards is a new aluminum beam frame (used mainly on superbikes), rising rate link type mono shock rear suspension, front and rear disc brakes, clip-on handle bars, projector headlamp, new digital instrument console and most importantly a completely new design. When launched, the Pulsar 250 will undoubtedly set the benchmark for ride, handling and performance in the premium biking segment in our country. *What do you think should Bajaj offer on the Pulsar 250? Please share your views in the comments section below.*
