Bajaj To Launch All New Pulsar

Bajaj Auto will launch an all new Pulsar next year. The two-wheeler major will upgrade the Pulsar series of bikes with new chassis, engine, design and technology. The current generation [Bajaj Pulsar](#) has outlived its life cycle and the new one is set to address major problems inherent in Pulsars like vibrations at high speeds and engine refinement. The company is also set to launch a more powerful variant of the Pulsar which could feature a 300cc four-valve powerplant with additional goodies including mono-shock, twin discs, 6-speed transmission, etc.
