Upgraded Pulsar 200?

A updated version of the Bajaj Pulsar 200 is being tested around the outskirts of Pune.

The bike was spotted with test plates by bikeindia. If you look closely you wont be able to find any difference compared to the regular Pulsar 200. Maybe Bajaj has tweaked the engine to extract more power to give the competition a run for their money. Or maybe Bajaj is going the FI route with the Pulsar 200. We want more power, well who doesn't?
