# Hero Honda Launches 2011 Karizma

Hero Honda has launched the new 2011 version of the Karizma R. The new 2011 Karizma R gets new colours on the instrumentation, clear lens indicators, new graphics (silver stickers), side reflectors, redesigned engine cowl, maintenance free battery, all black treatment and new colours. There is no mechanical change but Hero Honda is advertising ASFS technology in the engine, which is Advanced Swirl Flow System. The Karizma R is now available in Force Silver (looks very good), Spotlight White, Sport Red, Darling Yellow and Power Black.
