TVS Apache RTR 180 ABS Pictures

[singlepic id= 6818 w=540 h=375 float=center]

TVS had recently launched the Apache RTR 180 ABS. The ABS version of the Apache is priced at a premium of Rs. 12,000/- over the regular Apache 180 and has very few features which distinguish both the models. The TVS Apache 180 ABS has anti-lock brakes, which makes the braking extremely surefooted and safe. The ABS in the **TVS Apache** prevents lock up, thus proving steering control even during heavy braking. The Apache ABS is priced at Rs. 88,000/- (on-road, Pune) and is available across all TVS showrooms in the country.

The TVS Apache 180 RTR ABS is powered by a 177.4 cc, single cylinder, 4-stroke engine which produces 17.3 BHP of power at 8500 RPM and 15.5 Nm of torque at 6500 RPM. Mated to a 5-speed gearbox, the Apache 180 does 0-60 kmph in 4.15 seconds and has a top speed of 125 kmph. TVS offers the Apache 180 ABS in only white colour with orange graphics. The Apache ABS also features Rear Wheel Lift-off Protection (RLP), which regulates braking during deceleration to prevent lift off. You can switch off ABS via a button on the dash of the Apache 180, if you wish to do some stoppies.
