# **TVS Flame SR125 Launched**

TVS has launched the Flame SR125. The TVS Flame SR 125 is equipped with an electric start, weighs about 123 kgs and fires a single spark plug. The bike has a top speed at 95 kmph and churns out 10.5 bhp @ 7500 rpm. The disc brake version is priced at 47,550/- ex-showroom comes in dual tone colours of red and blue along with an all black edition and is available at all TVS dealerships across the country. However, for those not wanting in the disc brake, the bike is also available with drum brakes.

The bike's engine is propelled by a three valve, CC-VTi technology which ensures better pickup with optimum mileage and power. Developed with AVL Austria, this 125cc, three valve engine is tuned to the ideal tumble-swirl port combination such that city riding on this machine is really smooth and comfortable. The engine's hi-tumble reduces the need for constant gear shifting while the swirl port returns optimum mileage.

TVS Flame SR125 boasts of several style statements including stylish headlamps with two position lamps and embedded turn signal lamps which give the bike a sporty finish. The 24 mm front disc brakes are complemented with a chic triangular exhaust that is not only unique but also enhances performance and delivers the smoothest of sounds and low emissions. The bike flaunts an elegant backlit digital console that prominently displays the first of its kind intelligent mileage indicator (IMI), low fuel warning and service indicator. The rear end of the bike sports a dual lens tail lamp that is first in its class. TVS Flame SR 125 is the only Indian motorcycle to be equipped with a gadget boot which provides the facility of on-tank storage.
