Yamaha R15 Performance Exhaust System By TwoBros

MotorBeam.com

[Yamaha R15](#) owners have only one gripe with their bikes, POWER. But it seems Aladdin has answered their wishes in the form of the Two Brothers Racing exhaust system. The all new TBR V.A.L.E. Full system for the R15 not only improves performance but also aids to aural pleasure. These are just a few of the benefits that you gain by adding one of the all new M-2 exhaust systems to your bike. By reducing the weight, improving the horsepower and torque, the new slip-on for the new R15 is exactly what you need for unlocking all that your new bike has to offer. The exhaust costs Rs. 19,990/- with carbon or titanium canister versions going upto Rs. 27,000/-

The R15 started pulling pretty strongly right from 5000rpm unlike the stock model which does the

job from around 7000rpm. The midrange of the bike feels much stronger than the stock one making it a more tractable machine for city use. If one has to speak in terms of accurate timings then with the TBR exhaust system, the R15 managed 0-60km/h in 4.15 seconds as against 4.9 seconds of the stock bike. The R15 crossed the three digit mark in a mere 11.76 seconds with TBR which is much quicker as compared to 13.04 seconds with the stock exhaust. With an improvement of 1.28 seconds in the 0-100km/h run, the TBR system definitely does the job it is intended to do - [BikeIndia](#)
