Audi RS6 Sedan

Audi has showcased the new RS6 Sedan which has a twin-turbocharged 5.0-liter V10 engine (from Lambo) that delivers a staggering output of 580 HP between 6,250 and 6,700 rpm and a peak torque of 650 Nm available from 1,500 to 6,250 rpm.

This insane amount of power is transferred through Audi's quattro all-wheel-drive system. The car has a six-speed triptronic automatic transmission that allows drivers to change gears manually via the shift lever or the paddles on the steering wheel. This super fast Audi can reach from 0 to 100 km/h in 4.5 secs and is electronically limited to 250 km/h. This car looks very subtle, considering what it packs underneath. Vorsprung durch technik at its very best.
