Audi Unveils A7, India Launch In 2011

The Audi A7 is slated for India after its international debut in late 2010. This Sportback is more a style statement than anything else and we love the way it looks, better than the Mercedes CLS. The technology of the Audi Sportback concept is markedly futuristic. With its pronounced coupé-like silhouette and large rear hatch, the 4.95 m long (16.24 ft), 1.93 m wide (6.33 ft) and only 1.40 m high (4.59 ft) vehicle is boldly progressive for the luxury class. Power is provided by the world's cleanest diesel technology: the 3.0-liter V6 TDI clean diesel almost completely eliminates nitrogen oxides. And numerous measures to ensure top efficiency mean that the Audi Sportback concept is expected to achieve impressive fuel consumption figures of 5.9 liters of diesel per 100 kilometers.
