# **GM Launches Aveo CNG At Auto Expo**

The [Chevrolet Aveo](#) CNG is being launched with a company backed Sequential Injection type CNG kit. Sequential Injection represents the most advanced level of evolution for what concerns the equipment of gas injection. In the sequential system the ECU calculates the opening times of the injectors for each cylinder and acts separately on each gas injector with highest precision. The Aveo CNG will be made available first in Delhi by end of January.

**The highlights of Aveo CNG are :-**

- Sequential Injection kit with precise control of fuel delivery through electronic injectors ensuring efficient combustion
- Minimal deterioration in performance in petrol mode
- Hardened Valve seats and Anodized pistons are used in the proven 1.4L VGIS petrol engine. This ensures no engine damage or reliability issues on CNG mode.
- Minimum service requirement owing to advanced electronic operation.
- Reworked suspension that leaves the ride and handling unchanged after CNG kit fitment.

The customers will have an option of running the Chevrolet Aveo on CNG that will give class leading performance and fuel economy without any impact on vehicle warranty. The Chevrolet Aveo CNG also comes with a 3 years/100,000-km standard warranty, which is an industry first in the midsize sedan segment, and a service interval of 5,000 km or six months (whichever comes first).
