Chevrolet Unveils Cruze Z-Spec Concept

Chevrolet's designers developed the Cruze Z-Spec concept to reflect the car's global roots, but give it a uniquely American aesthetic. The Z-Spec concept demonstrates a cohesive design with a family of factory-engineered accessories and the best of the aftermarket under a single theme. The Cruze's JDSU SpectraFlair Orange Metallic exterior color and racing-inspired graphics give the car can't-miss-it distinction, while the ground effects, rear spoiler and other exterior cues are de rigueur among tuner enthusiasts. The same goes for the car's interior trim kit, shift knob and racing-style pedals. The Cruze Z-Spec concept is powered by the Ecotec 1.4L turbocharged engine and a six-speed manual transmission.

Chevrolet Cruze Z-Spec Concept Highlights :-
