Modified Chevrolet Cruze Looks Wicked

The Chevrolet Cruze is one car, which came and conquered the D-segment owing to the sheer value it offered its customers. However being a luxury car, it never looked sporty. But we Indians love sports car more than we like luxury automobiles. Thus a Cruze owner has gone ahead by changing the headlights, wheels, bumper of his car. The new headlights look smashing with DRL (day time running lights) and projectors. The wheels and skirts make the Cruze look sporty at the side, whereas the rear now sports a subtle rear spoiler, new bumper and dual twin exhausts. Overall the Cruze looks sporty, yet the modifications don't look overdone.
