# **Chevrolet Spark LPG Q & A**

We called up a GM dealership and inquired about the Spark LPG. The salesman told us that the Spark LPG is capable of a mileage of 13.75kmpl. It has a range of 355kms and has a 26.2 litre tank. In addition to the LPG tank, the Spark LPG has a petrol tank of 33 litres. The car is Rs. 30,000 dearer than its non-LPG counterpart and is available in PS and LS variants. However the most interesting part of the conversation was when we tried to show dis-interest in the Spark due to GM bankruptcy. The salesman told us that only GM UK is affected by bankruptcy and not India. Yes you read that right, **GM UK**. He said that Obama had done something, blah-blah. So we said that we are looking at a Maruti. To which he said that the Spark has a discount of Rs. 40,000 and has a bigger wheelbase.
