# **Fiat To Upgrade Linea & Grande Punto**

Fiat India had recently confirmed that they don't plan to launch anything new this year and even confirmed that a 1.6 liter Linea is all but true. However news has now surfaced which claims that a new improved Linea is on the cards which has undergone some cosmetic changes along with better interiors. Launch is expected b Diwali. Also an upgraded Grande Punto will be launched with the beige interiors (similar to the Linea). The Punto Dynamic variant will get integrated audio system as standard but will loose the rear power windows. We are unable to confirm the developments at Fiat India but the company has to do something amidst fierce competition.
