Fiat To Launch Small Car In 2012

[Fiat India](#) will start extensive testing of the first made for India car next year. The car will be manufactured at Fiat's Ranjangaon plant and will be powered by a 700-1000cc engine. The small car which has been designed at Fiat's design studio in Turin will be positioned between the A and B segments. Though Fiat hasn't divulged much information on the car, we expect it to deliver good mileage and cost anything below Rs. 3 lakhs.
