New Ford Fiesta To Launch In 2010

Ford has unveiled the Ford Verve Sedan Concept and the new Fiesta will take lots of cues from it. Expected in 2010, the New Ford Fiesta will be equipped with a variable valve timing 1.6-Litre VVT (Variable Valve Timing) engine and this will conquer its advanced features like Ford Sync (It is a factory-installed, in-car communications and entertainment system) developed by Ford and Microsoft. The elucidation of kinetic design on the four-door body has given the Fiesta sedan an uniqueness while maintaining the emotional appeal of its five-door sibling.

“This is a sophisticated small car. Design combines with advanced technology to deliver very high levels of refinement, safety and class-leading fuel efficiency. This new Fiesta proves Ford’s leadership in small car design and development.”
