# GM To Recall 1.3 Million Cars

[General Motors](#) is recalling 1.3 million cars in the US, Canada and Mexico to fix power steering motors that can fail and become harder to steer when traveling under 15 mph (24 kmph). The vehicles affected by the recall include 2005 to 2010 Chevrolet Cobalts, 2007 to 2010 Pontiac G5s, 2005 and 2006 Pontiac Pursuits sold in Canada and 2005 and 2006 Pontiac G4s sold in Mexico. The company will notify customers when to bring their cars to dealers for getting their electric power steering motor replaced.
