# **Honda Re-Launches City E Variant**

Honda India had discontinued the City's base variant E last year to make way for the Jazz. However the company has reverted its decision on the same and has re-launched the E variant again. The E variant lacks a lot of features like alloy wheels, fog lamps, height adjustable driver seat, body coloured mirrors, audio system, keyless entry, etc. However all the safety features are very much standard. The [Honda City](#) E costs Rs. 7,94,000/- (ex-showroom, Delhi). The 2010 Honda City is available in E, S and V variants.
