# **New Honda City Modified With Bodykit**

The old [Honda City](#) was very famous for being mod friendly, but the Honda Citys thereafter never really appealed to the enthusiasts. However the new version looks promising with 118PS on tap. In Malaysia a enthusiast has modified his City with widened fenders, redesigned front and rear bumpers, side skirt, air vents all around, new paint, new rims, new tyres, adjustable suspension system and a after market exhaust system makes the car look more aggressive.
