Hyundai i20 : More Pictures

We spoke about the specs of the i20 and posted some exterior pics of the i20 [here](#). Autobild seems to have checked out the i20 in person at the Paris Motor Show. Yes, the Paris Motor Show starts on 2nd but i guess they got to checkout the supermini before that. The interiors of the i20 are really very good.

The steering wheel seems to be from the Elantra. There is a integrated audio system which seems to be the order of the day for most cars.

The interior seems to be quite spacious for a hatchback. Expect beige interiors for the Indian version of the i20.

Here are some more pics of the i20.
