Hyundai To Launch Santro Facelift In 2009

Hyundai India is planning to launch an upgraded version of the Santro by the end of 2009. The Santro will receive some styling changes and there will be a marginal price hike for the 2010 Hyundai Santro. Hyundai will do some tweaking in the overall appearance of the car, but no engine change is on the cards. This change is a minor facelift and is mostly cosmetic.
