# Hyundai To Transform Verna With Facelift

The Hyundai Verna got a mild facelift in its home market last year and this year the company plans to give us the facelift in India. Dubbed the Verna Transform, the car received a number of technical enhancements along with heavily updated exterior and a few minor interior upgrades. The New Hyundai Verna Transform features a revised front fascia with more aggressive overall exterior look thanks to redesigned headlights, new signature grille with two bars, sportier front bumper, redesigned fog lights, larger air intakes, redesigned tail-lights, redesigned rear bumper. Inside, the new Verna Transform sports a revised center stack along with interior instrumentation lightning change from current green to blue. Engine specifications remain the same.
