Jaguar Recalls Certain XJ Models

[Jaguar](#) has recalled certain Jaguar XJ models to rectify issues related to brake pipes. There are no cars in India which are part of the recall. This recall is being carried out to rectify an issue with the abrasion of corrosion protection on under floor brake pipes through contact with a sound deadening pad on 2003/4 Model Year XJ vehicles.

"This is a proactive step taken to maintain Jaguar's steady improvement in quality and demonstrates the company's commitment to quality and the customer. "There is no cost to the customer and there have been no reported accidents as a result of the issue," a JLR spokesperson said.
