# Lamborghini's New Mystery Car

A pre-release from Lamborghini states : -

*"It's not just a new Lamborghini. It's a new world."*

The above photo accompanies it, showing only a center exit exhaust, some rear grillework, and a carbon fiber diffuser. And that's it. Try guessing what this car will look like. Lambo's letting the cat out of the bag on October 1st, and we're very curious as everyone else right now. Will this use the W16 engine of the Veyron, probably not but it can be the RWD Murciélago Superleggera.
