# **Mahindra Bolero Stinger Launched**

Mahindra has launched the Bolero Stinger. The Bolero Stinger is a customized concept which is based on the Bolero. Mahindra recently presented Indian opener Gautam Gambhir with a Bolero Stinger for his performance in New Zealand. The customized concept features a well designed bodykit, four large foglights and a massive air intake on the hood. There is also the uniquely stylized body cladding which gives the Stinger a wide stance.

Customized body paint along with special tail lamp bezel and rear roll cage lend the Mahindra Bolero Stinger a special look. Additional features include a premium MP3 player and a reverse camera with sensors. The Mahindra Bolero Stinger concept also offers custom fit colour co-ordinated interiors, customized floor carpeting and unique leather suede upholstery giving it an exclusive touch. Under the hood, the Stinger retains the 2.5 litre engine producing 97 PS and a prodigious 255 Nm of torque which gives the Stinger just about enough go to match its show.
