2009 Mahindra Scorpio Face-Lift

Mahindra is all set to launch a face-lifted version of the Scorpio in the near future. The changes to the new Scorpio are largely cosmetic. The new grille sports a central 'silver tooth' a new design element that's present on the Xylo and Bolero as well. The new Scorpio will only be available with the mHawk engine and the 2.6 CRDe motor will be discontinued.

The headlights are all new and the 'projector' lenses look terrific. The bumper too is all new and incorporates larger fog lights. The rear lights as well have been redesigned and we hear that there are changes to the interiors as well.
