Mahindra Scorpio LX 4X4 Launched

With the success of the XUV500, Mahindra has not forgotten the Scorpio. The company has launched a basic variant of the Scorpio 4x4, known as the Scorpio LX, which features 4-wheel drive and is priced at Rs. 9.17 lakhs (ex-showroom, Delhi). The Scorpio LX 4x4 is similar to the LX 4x2 on the outside, except it features 4x4 stickers on the vehicle and free wheeling hubs. On the inside, the Scorpio LX 4x4 features shift on the fly, 4-wheel drive lever, right next to the gear lever on the center console. The engine remains unchanged and is the same 2.2-liter, mHawk, CRDe motor which produces 120 BHP of power and 290 Nm of torque. Mated to a 5-speed manual gearbox, the Scorpio 4x4 is 100 kgs heavier than the 4x2 version.

The Mahindra Scorpio LX 4x4 features digital immobilizer, tilt-steering, power steering, power windows, central locking, tubeless tyres, rear spoiler and roof rack. There is no ABS or airbags on the LX variant and the Scorpio LX 4x4 seems to be directly waiting for the Tata Safari Merlin's arrival, with its aggressive pricing and go-most of the places ability. With most buyers preferring to opt for 4x2 versions of the Scorpio, the Scorpio 4x4 is just another model which might not attract as many buyers as the company would like.
