Maruti SX4 Diesel Arrives

Maruti Suzuki will launch the SX4 diesel by the end of this month, but the car has already reached a dealership in Huble, Karnataka. The demo car features the DDiS and ZDi badge and those are the only visible differences between the oil burner and its petrol counterpart. Powered by the Fiat sourced 1.3 liter Multijet, the diesel powered SX4 features VGT which helps it produce 90bhp of power. The SX4 diesel weighs 70kgs less than the Tata Indigo Manza and Fiat Linea Diesel and will be priced Rs. 70,000/- more than the petrol variants.
