# **Mercedes-Benz Launches E-Class Cabriolet**

Mercedes-Benz has announced the launch of the E-Class Cabriolet in India. The E-Class line up is complete with a retractable soft top roof and offers comfortable seating for four people. The E-Class Cabriolet adds to this multi-faceted E-Class line-up making a lifestyle statement par excellence promising an engaging driving experience with the top on or off. Thanks to its classic soft top, the four-seater convertible delivers that unadulterated cabriolet feeling. AIRCAP® is an automatic wind deflector that can be deployed at the touch of a button to significantly reduce turbulence in the vehicle's interior. It also dispenses with the assembly required for conventional wind deflectors and leaves the side profile of the Cabriolet undisturbed. The E-Class Cabriolet is priced at Rs. 64.5 lakhs (ex-showroom, Delhi).

"The E-Class Cabriolet heralds a new era of Open top motoring. With its launch, the versatility of the E-Class range is further reinforced; the E-Class now offers the Cabriolet in addition to already present the E-Class Saloon and the E-Class Coupe. The E-Class has seven offerings for the discerning customers who seek individuality, expression and dynamism through the cars they drive" commented Dr. Wilfried Aulbur, Managing Director, Mercedes-Benz India said.

The production standard sound-dampening soft top comes with extremely high-quality insulation to deliver comfortable travel with the top up. Thus, the closed E-Class Cabriolet offers one of the quietest interiors in the segment of four-seater premium soft-top convertibles. The top can be open or closed at the touch of a button in only 20 seconds – even while driving at speeds of up to 40 km/h. Like all E-Class models, the Cabriolet also offers an outstanding level of safety with standard equipment that include the ATTENTION ASSIST drowsiness detection system, PRE-SAFE® predictive occupant protection, the intelligent light system among others. The E-Class E 350 Cabriolet sports a 3.5 litre engine delivering a powerful output of 272 hp and a torque of 355 Nm celebrating the sheer driving pleasure.
