Mini Clubman Airstream Trailer Concept

A specially modified Mini Cooper S Clubman and a 6.80-meter or 22-foot Airstream trailer (created by Danish furniture producers) is the creation of a mobile base for surfers and beachgoers. The trailer comes with a waterproof interior that is outfitted with numerous chairs, a table and even two surfboards halves, which double up as shelving. A special feature of the trailer is that it fully opens on one side revealing a built-in sun-bathing bed.

In the Clubman, the designers have removed the rear seat and stripped out the boot to fit four specially made

securing shells with purpose-built mounts that can accommodate diving gear equipment, including flippers, a mask, wetsuit and oxygen tanks.
