# Thoughts On The Mitsubishi Outlander

The Mitsubishi Outlander was a very awaited car before its launch, but it really has not lived up to what was expected from it. Surely it looks cool and it does have some very good features like paddle shifts but Mitsubishi missed the point by putting a petrol engine into the Outlander. The Captiva's diesel powerplant is what helps it sell so much.

Checkout the interiors of the Outlander, i think Mitsubishi should get full points for the well laid out interiors. Now only if Mitsubishi get the EVO X, everyone would go crazy. There is news though that the EVO X is coming, more on that later.
