Renault To Launch Twizy In India

Renault has aggressive plans for India with the upcoming Micra, Fluence and Koleos cars. However just like the trend nowadays of brand building, the company intends to launch the zero emission Twizy in the country. The Twizy is an innovative vehicle for urban mobility with four-wheel chassis and offers the driver and passenger an all-electric means of transport with zero CO2 emissions. At 2.30 meters long and just 1.13 meters wide, the Twizy can fit about any parking slot. Turning circle of just 3 meters can help you tackle traffic just like you would on a scooter. The 20bhp electric motor develops 7.14kgm of torque helping the Twizy to attain a top speed of 75kph. Acceleration is similar to a 125cc bike and prices are expected to be anywhere north of 8 lakhs.
