# Renault Twizy ZE Concept Unveiled

Renault Twizy ZE Concept is an innovative response to the challenge of urban mobility. With its fourwheel chassis, Renault Twizy ZE Concept offers the driver and passenger - seated one behind the other - an all-electric means of transport which produces no CO2 emissions. Renault Twizy ZE Concept is compact, nimble and practical - everything you need in city traffic. The wraparound bodywork creates a safe, reassuring cocoon which offers first class protection for both the driver and the passenger.

Power comes from a 15kW electric motor which develops 70Nm of torque, making it versatile and easy to drive. The acceleration performance of Renault Twizy ZE Concept in urban and suburban traffic is comparable to that of

a 125cc motorbike.
