Renault To Launch Fluence & Koleos In 2011

Renault will launch two models in India in 2011 that will be rolled out from the company's upcoming Chennai plant. The company also plans to resume its investment plans for India that was stopped due to the global economic slowdown. Renault will be launching the Fluence and Koleos crossover in the second half of 2011, both the cars will come in petrol and diesel versions. These cars will be produced in Chennai. The company's full range will have small to luxury cars.
