# **Mahindra To Launch Reva In China**

Mahindra plans to enter China by launching products from the world's largest electric vehicle manufacturer Reva. The demand for electric vehicles is on a rise since the world has started to become more environment conscious and the government has started to implement stricter emission norms. China is one of the largest auto market and given the huge demand for eco-friendly vehicles it could generate in future, Reva would take its cars there. China would see a demand of 5 million electric cars by 2020. Reva currently ships cars to the UK and Norway.
