# Reva G-Wiz Discontinued In UK

The Reva maybe a green vehicle but its not all that practical thanks to its low range and slow acceleration. The company sells the Reva as the G-Wiz in UK through its exclusive importer GoinGreen. However with cars like the Nissan Leaf, Citroen C-Zero, Peugeot iOn and Mitsubishi i-MiEV coming up soon in the UK, the G-Wiz is completely out of place. Thus GoinGreen is planning to discontinue the all battery powered G-Wiz in the UK. The Indian Reva will continue to sell in its current avatar as we are yet to get other electric vehicles which could compete with the Reva at similar price points.
