# Skoda Laura To Get A Facelift

The Skoda Laura Has been on the Indian market since quite a while without undergoing any significant changes. Skoda has unveiled the new Laura prior to the Paris Motor Show, which is essentially the same with a bit of a facelift.

The newer model will have the front bumper styling similar to that seen in the Superb while changes at the rear are narrowed to the restyled tail lamps and the tweaked bumper. The revised Laura liftback and station-wagon models also feature door mirrors with integrated turn indicators and new alloy wheel designs. It is expected to hit the Indian market in early 2009.
