Skoda To Launch Laura RS

After the successful launch of the new [Skoda Laura](#) and [Skoda Superb](#), Skoda India is readying the launch of the new Laura RS. The RS will possibly be available in two variants - 2.0L TSI petrol with 200PS and 2.0L TDI diesel with 170PS. The Laura RS interior and exterior will be slightly different from the regular Laura, with the emphasis on sporty design. With lower drag coefficient, better aerodynamics, sports suspension and a new sporty body kit, the Laura RS show matches its go.

The Laura RS will be available after the launch of the Skoda Yeti SUV. The Skoda Yeti is scheduled to be launched by the end of this year. Skoda will soon be showcassing the RS in cities such as Mumbai and Delhi to gauge customer response. If the Octavia RS is anything to go by, than the Skoda Laura RS will be an absolute hoot to drive.
