Is Octavia that Fuel Efficient?

We all find Skoda's Octavia to be a fantastic car and it does manage to sell quite a bit. However the car is cramped and old. People buy it for the sake of its fuel efficiency. But is it that fuel efficient as people make it out to be? We find out.

It isn't all that fuel efficient. Figures of 18+ kmpl are not what you would get under normal driving conditions, we managed to get 10.4 kmpl (see image below) which isn't all that impressive for a car which sells mostly for its high fuel efficiency.
