Skoda Roomster

Skoda India is planning to **launch** the **Roomster** in India in 2009. The Roomster may not be the best looking car around but it is known for its roomy interiors and the space it offers.

The car will be priced around Rs. 9 lacs, which seems a tad high for a car as big as the Ford Fusion. Engines expected are the 1.4 Diesel and 1.4 Petrol found in the current Fabia.
