Tata Indica Vista EV

The Tata Indica Vista EV is the electric version of the award winning [Indica Vista](#) with more environmental friendliness. The *Indica Vista EV* is capable of carrying four individuals, adequate luggage space, with a predicted range of up to 200 km and acceleration of 0-60 kmph in under 10 seconds.

Tata Motors continues its innovative approach with the Indica Vista EV too, using super polymer lithium ion batteries which have superior energy density to conventional batteries. Tata Motors' electric vehicles will be

produced in association with Miljo Grenland/Innovasjon, Norway. Tata Motors' UK subsidiary, Tata Motors European Technical Centre plc, has a 70% stake in Miljo. The first such vehicle to be developed by the company is the Indica EV, which is currently undergoing extensive tests in Europe.
