Tata SA Offering Lease Plans On Vista

Tata Motors is offering the option of leasing the Indica Vista and at no extra cost in South Africa. The lease ownership includes fixed monthly installments, free comprehensive insurance, no extra maintenance costs, free road-side assistance, tracking device accident alert and replacement of tires. Tata is offering the leasing facility of their model the Vista Ego. The Vista Ego is sold in the African countries. Thus, this leasing option is not going to be available for the Indian customers as of now. But with Mercedes-Benz offering lease and BMW contemplating the same, could Tata Motors do the same with their not so hot selling cars like the Nano and the Aria?

TATA MOTORS

Can't afford
