New Tata Indigo Manza Undisguised

Tata Motors seem to have been shooting a commercial for the new [Indigo Manza](#) on the outskirts of Pune, where the car was snapped in full glory. The Manza looks big and is going to take the segment by storm. The rear looks a little out of shape which seems to be a norm in the C segment after the [Swift DZire](#) stepped in. It is quite evident in the pictures that the designer of the Manza loves chrome but we are not complaining, yet.
