JBL Tata Nano At 2010 Auto Expo

JBL Audio has displayed a JBLfied [Tata Nano](#) at the 2010 Auto Expo. The JBL Nano (we like to call it) has been modified tastefully with bigger Maxxis tyres (with V thread pattern), alloy wheels, rear-hinged suicide doors (which will be remote operated in the future), glass rectangle at the rear (encourages people to have a dekho of your ICE), new paint job, rear spoiler, leather seats, new bumpers, performance gauges, projector headlights and blackened tail lights. The whole car including the exterior and interior has been painted in JBL colour scheme of orange and black.
