Tata Nano Most Fuel Efficient Car

Automobile Research Association of India has certified that Nano, the cheapest car in the world with a price tag of Rs 1.2 lakh in Delhi, is also the most economical one among the 450 models available in the market. Fuel costs are by far the largest component of the overall operating cost of a vehicle in India making it the single most factor influencing customer decision. Tata Nano is more fuel efficient than the Maruti A-Star by 4 kmpl by posting a mileage figure of 23.6kmpl.

Maruti Suzuki still remains the company with the most fuel efficient cars by occupying 2nd and 3rd places for the most efficient petrol engine cars while also coming up in third position in the diesel category. Tata Motors topped the study with the Tata Nano while the Indigo Dicor Saloon came 2nd in the diesel category. Hyundai shared the third position in the petrol engine category with Maruti Suzuki Alto for its i10 while topping the diesel category with the Verna.

Top 3 Fuel Efficient Petrol Cars in India

1. Tata Nano - 23.6kmpl.
2. Maruti Astar - 19.6kmpl.
3. Maruti Alto/Hyundai i10 - 18.1kmpl.

Top 3 Fuel Efficient Diesel Cars in India

1. Hyundai Verna - 21.9kmpl.
2. Tata Indigo Dicor - 21.4kmpl.
3. Maruti Swift - 21kmpl.

We would advise you to take these figures with a bucketload of salt. We are quite surprised to see that ARAI which approves cars for the country can be so unrealistic when it comes to mileage figures.
