Tata Xenon XT Launched

Tata Motors has launched the Xenon XT (Cross Terrain) in India. The Xenon is a 4 door, 5 seater lifestyle pick-up. The Xenon XT is priced at Rs 7.62 lac for the 4x2 version and Rs 8.58 lac for the 4x4 version, ex-showroom Delhi.

The Xenon XT is powered by the 2.2 VTT DICOR diesel engine with a peak power of 140 PS and a peak torque of 320NM. The same engine does duty in the Sumo Grande and Safari. Xenon XT also comes with shift on the fly 4WD system. The Xenon XT get loads of features like power steering, power windows, central locking, HVAC (Heating Ventilation and Air Conditioning), electrically adjustable side rear view mirrors, height adjustable seat belts, engine immobiliser, seat belt warning & door open warning, 16 inch alloy wheels and tubeless tyres.

The Xenon XT can be customised to suit individual preferences through a range of accessories which will be on sale along with the vehicle. Accessories include bed-liners, fog lamps, canopy, boot lid and rollover bars.

The Xenon is already being retailed in the overseas markets of Thailand, Algeria, Italy, Poland, Saudi Arabia and South Africa. Tata Motors have already sold 6,000 Xenon XTs in the overseas market. This is the sixth vehicle launched by Tata Motors in FY 09.
