Facelifted Toyota Innova Launch Soon

The much awaited new Toyota Innova will be launched on 28th January. There is not much new in the new Innova except some small refreshments. The launch of the facelifted Innova seems apt as the Mahindra Xylo was launched some time back. You can check out the pics of the [facelifted Innova](#).

The facelifted Innova gets a refreshed bumper, new headlamps, new tail lamps, new front skirt, new fog lamps and a new grille. These changes give the Innova a much needed mature look. The new Innova also gets climate control A/C, steering mounted audio controls and an in-dash CD changer along with changes in the interior trim.
