New Toyota Innova

It is no secret that Toyota is feeling the heat in the UV segment with the launch of the 2.2 AVL powered Scorpio and Safari. Thus Toyota decided that it shall give its best selling vehicle in India a slight refereshment in the form of a MMC (Mid Life Minor Change)

The new Innova is expected to be here by Decemeber and will have only cosmetic upgrades along with some more useful features like climate control, audio controls on steering wheels, reverse parking sensors and the likes. On the exterior the car gets a new grille, new head lamps, new LED tail lamps and newly designed alloys. Nothing much new in the Innova but a welcome change.
