Valets Abusing Hotel Guests' Cars In Missouri

[youtube:http://www.youtube.com/watch?v=2blopK18udM 540 375]

Do you trust the valet guys with whom you leave your car for parking? The above video is being called appalling and unreal. It shows a valet at the Hyatt Hotel in downtown St. Louis, Missouri doing donuts, peeling out, burning out, revving engines and spinning tires in expensive cars, without the owners ever knowing it.. " Someone calling himself "valet underground" posted dozens of videos on YouTube, showing fancy cars being driven to the extreme in a parking garage about six months to a year ago.

The general manager of the Hyatt hotel who sits in the shadow of the Gateway Arch, confirms it happened in his garage. Tire marks are still visible on the pavement. Hyatt has fired the valet company, which has been identified as AAA Valet, from Atlanta, even before knowing about the video. The hotel replaced them with a St. Louis based valet company, and once the hotel saw the video, they alerted AAA Valet about their employees' conduct.
